Crossroads4Hope
Taking On Your Cancer Journey. Together.®

“This group has been a HUGE help to my family, especially my littles during my cancer journey. They are there for other thrivers and survivors and their families all free of charge.”

Mission

Crossroads4Hope offers people diagnosed with cancer and their loved ones, at no charge, a network of resources, information, support, and professionals that are fundamental to helping people live through and beyond cancer with strength and hope.

Vision

A world where the best cancer care prioritizes the needs of the whole person and their entire family, including emotional and social wellbeing and practical support people need, regardless of who they are or where they live.

When Cancer puts you at a Crossroads... you are not Alone.

At Crossroads4Hope we break down barriers to healthcare that put people's lives at risk

Joining our community simply starts with enrolling into **MyGo2Support**.

You will have access to support 24/7 at your fingertips without having to download an app.

MyGo2Support connects YOU to:

- Licensed professionals to discuss your concerns
- Routine check-ins to address individual support, resource navigation, and referrals
- Digital companion that subtly delivers ongoing tips and information specific to where you are on your cancer journey
- Crossroads4Hope's essential programming focused on support, education, nutrition, and wellbeing

To enroll please visit:

When families are impacted by pediatric cancer, an adult cancer diagnosis or coping with a loss due to cancer our Support4Families program will:

- Empower families with communication strategies
- Share positive coping mechanisms
- Offer opportunities for creative expression
- Engage members through social connections
- Provide emotional support in individual, family, and group formats

Our unique approach ensures individualized care for each family to best suit their needs.

We are mobilizing Health Champions to act as "first-responders" in key vulnerable communities to help close the cancer care gap. We prepare individuals to engage in shared treatment decision making with their healthcare team, because your voice matters!
